Water is a must requisite for every Industry. Raw water entering in an industrial plant often needs treatment to meet tight quality specifications. **Water Treatment** is used to optimize most water-based industrial processes, such as heating, cooling, processing, cleaning, and rinsing so that operating costs and risks are reduced. Water

is essential for life. Agriculture, Industry and house-hold usage are the key user of water. By 2030, according to NITI Aayog report submitted in June 2018, the country's water demand is projected to be twice the available supply, implying severe **water scarcity** for hundreds of millions and an eventual loss of around 6% of

the country's GDP. Industry is bound to suffer in terms of availability of water, quality of water, impact of scarcity on process control and cost of water. In this perspective **Waste/Effluent water treatment, Water Harvesting, Reducing Water Consumption, Reusing of Water & Recycling of Water(3R's)** etc have immense importance to solve the water problem in all facets of life, including industry, domestic and agriculture.

Efficient Water Management is critical to the operation of any plant. Under inadequate control, the water system can create significant difficulty to the plant like Loss of production capacity, increased cost of cleaning and protective chemicals, performance of cooling tower, Quality of Water, Scaling, Corrosion, Microbiological Activity, Heat Transfer Efficiency and disposal of residual wastewater, increased energy Maintenance costs and Reduction in service life. **Water Management** encompasses all aspects which include **sourcing of water, pre-treatment** of Water to meet required **quality, Desalination, Boiler Water Treatment, Cooling Water Treatment, Cooling Towers, Heat Exchangers, Waste/Effluent Water Treatment, Recycling of water, Water Harvesting, Reducing Water Consumption, Corrosion, Scaling & Fouling, MIC, Corrosion Monitoring, Heat Transfer Efficiency, Coating/ Lining**, Use of suitable **Metallic/Plastic Materials** etc. **Water Management** is very critical for smooth process control.

3rd Water Treatment & Management(3rd WTM) is the **3rd initiative** is one of the few initiatives to conduct a technical summit covering various critical aspects of Water Management and water treatment. It will provide an ideal platform for the professionals from various industries, academia and research institutions to meet and share the problems and their solutions.

The technical programme will cover, but not limited to the following topics:

- **Industrial Water System:** Sourcing of water (river water, sea water, portable water etc), Minimal Water use, Recycling, Closed loops system, once through system, Open recirculating system treatment.
- **Design Practices & Efficiency in Industrial Water System:** Best design Practices, Applicable codes & standards, Heat Transfer Efficiency, Chemical cleaning & passivation, Water Pre-treatment, Demineralization, Desalination, Filtration, Cooling water Automation, Fire Water System etc.
- **Design & Operation aspects in Cooling Water, Boiler Water System:** Cooling Water System & utilities, Cooling Water Treatment, Bio Control, Boiler Water Treatment.
- **Water Treatment & Chemical Injection:** Chemical treatment, efficiency of chemical treatment, Corrosion Inhibitor dosing, Types of Inhibitors, Dosing efficiency, De-foamers, Demulsification, Oxygen Scavengers, Chlorine Dioxide, Maintenance Chemicals, Reverse Osmosis Chemicals, Dust Control Chemicals, Innovative Products etc.
- **Cooling Towers, Boilers, Tanks, Heat exchangers, Pumps:** Cooling towers, Boilers, Water Tanks, Heat exchangers, Water Pumps, Pipes, Valves, Heating, ventilation and air conditioning (HVAC), Scale/Deposit controllers, Fouling Control.
- **Waste/Effluent Water Treatment & Recycling of Water:** Waste Water Treatment, Effluent Water Treatment, Water Pinching or Reducing Water Consumption, Recycling of Water, Water Harvesting.
- **Water Pipeline & Supply:** Water pipeline, Municipality Water Supply & Distribution, Pipeline Construction
- **Corrosion Control, MIC & Inspection:** Corrosion Control Measures, Coating, Corrosion & Scale control, Microbiological control, Bio-cide treatment, Bio-fouling, Corrosion Monitoring, corrosion probes and coupons, Inspection of Exchangers, Boilers, Cooling Towers, Online Inspection etc.
